## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 62-104 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Woodward (USP 5,852,557). Woodward (see figure 5 and 6) discloses a control system for controlling a multiphase output regulator (column 4, lines 1-30) that controls a one of the leading edges and the trailing edges of the drive signals to dynamically set the phase interval between each of the output phases.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-61 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Lethellier (USP 6,703,812). Lethellier discloses a control system that has two switch arrays (12 and 14) and (22 and 24) with digital controller (34 and 36) to determine a quantity of output phases to generate drive signals to control each of the switch arrays to generate the output phases.
